

Work Notice
Schlage Operable Unit (OU) and UPC OU
2401 and 2555 Bayshore Boulevard
San Francisco, CA

Field Work Beginning March 19, 2010

Purpose of this Work Notice:

The Department of Toxic Substances Control (DTSC) is distributing this notice to inform the community about upcoming work at the Schlage OU and UPC OU (Site) located at 2401 and 2555 Bayshore Boulevard, San Francisco, CA. Previous investigations have determined the presence of metals in soil, and volatile organic compounds (VOCs) in soil and groundwater beneath the site as a result of past manufacturing activities.

What work will be done?

DTSC approved a Remedial Action Plan (RAP) on November 16, 2009 to clean up the soil and groundwater at the site. Work will be conducted to clean up the contamination in the soil. The work will consist of excavation and treatment of approximately 17,000 cubic yards of VOC impacted soil. This work is expected to start **March 19, 2010**, and will be completed in about four months. All work will be conducted between the hours of 7:00 am and 6:00 pm, Monday through Friday. Work activities will include the following:

- Excavation and stockpiling of impacted soil. Soil will be excavated and covered temporarily with plastic sheeting. Stockpiles will not be greater than 10 feet high.
- Backfill of excavations with clean soil. Clean soil from the site will be used for backfill. Trucking in soil will not be required.
- Starting in late April or early May stockpiled soil will be spread within a contained area on the site and tilled with farm equipment to aerate the soil. The soil will be sprayed with water to manage dust. Personal monitoring of workers and perimeter air monitoring will be conducted.
- Workers will be operating heavy equipment and wearing personal protective equipment and safety gear while working.

There should be no significant dust, disruption of traffic, or other nuisances associated with this work.

How can I find out more?

This notice is being sent to the community for informational purposes. This document and a complete record of the site can be found at:

SF Public Library
Visitacion Valley Branch
